

WhatsApp ChatBridge CRM Add-on

Direct-to-WhatsApp Lead Generation, Smart Pre-Filled Prompts, Business Hours & Offline Inquiries CRM

Pricing: \$5.00 / month | GHS 75.00 / month (Paystack Recurring)

Why It Converts: Solving the 85% Mobile Conversion Drop-off

In emerging & mobile-first economies, over 85% of purchases and bookings close on WhatsApp. Traditional email forms are ignored. ChatBridge turns any Dakyworld site into an active conversational funnel: daytime visitors connect with pre-filled intent, while nighttime visitors are captured into a dedicated CRM inbox.

Four Pillars of WhatsApp ChatBridge CRM

01 Context-Aware Pre-Filled Prompts (Business Hours)

Instead of dropping visitors into an empty chat, the widget suggests 2-3 page-specific prompts (e.g. 'Inquiring about Dental Implants' on /treatments). One tap launches WhatsApp Web or mobile app via wa.me with the prompt pre-typed.

02 Never-Lose-A-Lead Offline Form (After Hours & Weekends)

When visitors arrive outside configured hours, the widget gracefully switches to an offline lead catcher. Prospects submit their Name, WhatsApp number, and question, setting clear expectations of an early-morning response.

03 Instant Zero-Friction Owner Alert & 1-Tap Reply Loop

The moment an offline inquiry lands, Dakyworld sends an SMS/WhatsApp alert to the owner's phone with a 1-tap waLink. The business owner taps the link and is instantly chatting with the lead on WhatsApp—no dashboard login required.

04 Inquiries CRM Dashboard & PDF Billing Action

Inside Dakyworld, owners access a live pipeline of all inquiries with lead status (New, Contacted, Won), page origin, and a 1-click 'Send PDF Invoice' button that links directly to Dakyworld's automated invoice generator.

Zero-Bloat Technical Architecture

- Lightweight Embed Script: Pure 3.8 KB vanilla JS (<0.05s load), 0 external dependencies, preserves 100/100 PageSpeed.
- Reuses Dakyworld Core: E.164 phone parser & waLink in lib/phone.ts, honeypot botCheck.ts, and messageSender.ts.
- Data Privacy & Deliverability: Click-to-chat requires no Meta Business verification or per-conversation messaging fees.

1. Monetization & Unit Economics (GHS 75 / \$5 Monthly)

Metric	Value	Strategic Impact
Monthly Add-on Price	\$5.00 / GHS 75.00	Micro-SaaS impulse pricing, easily paid via Paystack MoMo or Card
Annual Pre-pay Option	\$50.00 / GHS 750.00	2 months free; locks in 12-month retention and upfront cashflow
Estimated Monthly COGS	~\$0.25 (SMS alerts)	95% gross profit margin per active subscriber
Included Notification Quota	100 Owner SMS Alerts	Sufficient for 98% of SMBs; top-up pack GHS 25 for 200 SMS
Client ROI Justification	1 closed deal in 3 months	Single customer booking typically yields GHS 500 - GHS 5,000+

2. Traditional Static Website vs. Dakyworld ChatBridge Flow

The Old Way (Static Form / Empty Chat)

- Visitor fills 5-field contact form or clicks blank wa.me
- Inquiry sits unread in info@ email spam folder for 3 days
- After-hours visitors bounce immediately to a competitor
- Business owner has zero record of website visitor inquiries

The Dakyworld ChatBridge Way

- One-tap contextual prompt matches exact page viewed
- Nighttime visitors captured via automated offline form
- Owner receives instant SMS alert with 1-tap waLink
- Real-time Dakyworld CRM tracks leads & one-click PDF invoices

3. In-Editor Configuration Panel (What the Creator Controls)

WhatsApp Number:	Local or international mobile number; validated with E.164 (+233 24 123 4567).
Agent Persona:	Custom Support Name (e.g. 'Kwame / Client Concierge') + uploaded brand avatar photo.
Working Schedule:	Visual Day/Time matrix (Mon-Sat 8:00 AM - 6:00 PM) for automatic online/offline switching.
Context Prompts:	Custom prompt rules: e.g. /pricing -> 'I have a question about your pricing plans'.
SMS Alert Target:	Owner's phone number where high-priority new-lead alerts are instantly delivered.
